EUROSPINE DIPLOMA IN INTERPROFESSIONAL SPINE CARE (EDISC)

MODULE 1 (CORE SKILLS 1):
USING LITERATURE TO INFORM MY PRACTICE
1 July 2019

PRELIMINARY PROGRAMME
QUICK FACTS

WHEN: 1 July 2019
WHERE: Geneva, Switzerland
University Medical Centre – CMU (Centre médical universitaire)
Rue Michel-Servet 1
1206 Geneva
SWITZERLAND
+41 22 379 15 15
https://www.unige.ch/presse/plans/cmu/

MAXIMUM ATTENDEES: 40 delegates
REGISTRATION FEE:
EUROSPINE Member: €200
Non-member: €300

CME CREDITS: Application to EACCME pending
LANGUAGE: English
DRESS: Casual

IMPORTANT NOTE:
Attendance at every session is mandatory.
This will be a paperless course and no printed programme will
be provided.
A wireless Internet device (mobile
phone for the app and minimum of tablet/laptop for support
documentation) will be necessary to
access on-line resources during the course and for completing
the course evaluation. Please bring one with you.
The course evaluation is mandatory to obtain the CME
certificate.

TARGET AUDIENCE

Healthcare professionals in Europe in order of availability and access: Primary Care
Physicians and Surgeons, Physiotherapy, Chiropractors, Osteopaths, Naprapath and others
who are graduated as clinicians from a recognized institution (i.e. professional school or
university).
At least two years of clinical experience is recommended but all new graduates are
encouraged to register.

AIMS OF THE MODULE

This course will provide participants with the necessary skills to critically appraise the quality
of the spine literature. Specifically, the course will introduce basic study designs and discuss
the main threats to the validity of clinical studies.
Learning methods include didactic lectures and workshops. Recently published papers will be used in the workshops. The topics covered in the course include: the importance of research to inform practice, randomized clinical trials and cohort studies.

Participants will learn to use a critical appraisal tool to assess the quality of randomized control trials and cohort/prognostic studies.

LEARNING OUTCOMES

This module aims to enable learners to:

General outcomes and objectives
- Evaluate the quality of randomized clinical trials (RCTs);
- Evaluate the quality of cohort/prognostic studies;
- Understand the place of critical appraisal in a clinical practice that includes published evidence and patients’ perspectives;
- Judge whether to change their practice based on new evidence.

Outcomes and objectives for session 1: Introduction to critical appraisal
- Understand the place of critical appraisal in clinical practice that includes published evidence and patients’ perspectives;
- Identify the research question and study objective in a published article;
- Understand the notions of statistical significance and clinical importance of study results;
- Judge when to change their practice based on new evidence.

Outcomes and objectives for session 2: The architecture of RCTs: What clinicians need to know to determine the quality of a RCT
- Understand the basic design of a RCT;
- Understand key issues to address when critically appraising a randomized controlled trial: selection issues, randomization, measurement of key outcomes, comparability of groups, data analysis.

Outcomes and objectives for session 3: The architecture of cohort/prognostic studies: What clinicians need to know to determine the quality of a cohort/prognostic study
- Understand the basic structure of cohort/prognostic studies;
- Understand the role of data registry in the conduct of cohort/prognostic studies;
- Understand key issues to address when critically appraising a cohort/prognostic study: selection of participants, measurement of exposures and outcomes, control for confounders and interpretation of results.

Outcomes and objectives for Workshop 1: Critical appraisal of a RCT
- Critically appraise a published randomized controlled trial using a standardized critical appraisal tool and identify the main threats to its validity;
- Discuss the validity of a published randomized clinical trial;
- Discuss the relevance of results of a published randomized clinical trial.
Outcomes and objectives for Workshop 2: Critical appraisal of a cohort/prognostic study

- Critically appraise a published cohort/prognostic study using a standardized critical appraisal tool and identify the main threats to its validity;
- Discuss the validity of a published cohort/prognostic study;
- Discuss the relevance of results of a cohort/prognostic study to clinical practice.

INSTRUCTIONAL METHODS

The following instructional methods will be employed in the teaching of this module:

- Pre-learning activities: Preparatory readings;
- Classroom teaching: Interactive lectures that extend from theory to case-studies;
- Workshops: Facilitated group discussions and practical workshops.

All instructional methods should require active participation, consistent with the range of motivations for pursuing the EDISC programme. There should also be a strong emphasis on self-directed learning and pre-reading.

FACE-TO-FACE LEARNING SESSIONS

Introduction to critical appraisal

- Lecture: This session will introduce learners to the importance of critically reading the clinical literature and introduce the basic principles necessary to evaluate the quality of RCTs and clinical practice guidelines.

The architecture of RCTs: What clinicians need to know to determine the quality of a RCT.

- Lecture: The session will provide basic knowledge of the methodological design of RCTs
- Activity: The instructor will facilitate the evaluation of a RCT with the class by using a critical appraisal tool

The architecture of cohort/prognostic studies: What clinicians need to know to determine the quality of a cohort/prognostic study.

- Lecture: The session will provide basic knowledge of the methodological design of a cohort/prognostic study.
- Activity: The instructor will facilitate the evaluation of a cohort/prognostic study with the class by using a critical appraisal tool.

Workshop 1: Critical appraisal of a RCT

- Activity: In small groups, learners will work together to evaluate a RCT using the CASP Randomized Controlled Trail Checklist. The instructors will serve as methodological experts to guide the small group interactions. The critical appraisal session will be followed by a consensus discussion that will involve all learners.
Workshop 2: Critical appraisal of a cohort/prognostic study

- Activity: In small groups, learners will work together to evaluate a cohort/prognostic study using the SIGN tool. The instructors will serve as methodological experts to guide the small group interactions. The critical appraisal session will be followed by a consensus discussion that will involve all learners.

ASSESSMENT

Participants will be provided with two articles, reporting a RCT and cohort study; they will have to pick one of the two, fill the corresponding grid (either CASP or CEBM) and write a structured abstract summarising their analysis of the articles; model abstracts will be provided at the end of the two workshops and include the following structuring keywords: Objective, Methods, Key results, Strength and weaknesses, Conclusion.

COURSE EVALUATION BY THE PARTICIPANTS

In line with EACCME’s requirements for accredited activities, participants will be requested to complete a mandatory course evaluation at the end of the module in the form of a short online survey. Responding to the survey is a condition in order for participants to obtain their CME certificates.
