EUROSPINE DIPLOMA IN INTERPROFESSIONAL SPINE CARE (EDISC)

MODULE 4: ASSESSMENT, DIAGNOSIS AND MANAGEMENT OF SPINAL PAIN

14-15 January 2021

PRELIMINARY PROGRAMME
QUICK FACTS

WHEN: 14-15 JANUARY 2021
WHERE: IRCAD
Hôpitaux Universitaires
1, place de l’Hôpital
67091 Strasbourg, France
www.ircad.fr
+ 33 (0)3 88 11 90 00

MAXIMUM ATTENDEES: 50 delegates
REGISTRATION FEE: EUROSPINE Member: €400
Non-member: €600

CME CREDITS: Application to EACCME pending
LANGUAGE: English
DRESS: Casual
CME CREDITS: Accreditation by EACCME® (European Accreditation Council for Continuing Medical Education) pending
LANGUAGE: English
DRESS: Casual

IMPORTANT NOTE: Attendance at every session is mandatory.
This will be a paperless course and not printed programme will be provided.
A wireless Internet device (mobile phone/iPad/computer) is mandatory to access on-line resources during the course and for completing the course evaluation. Please bring one with you.
The course evaluation is mandatory to obtain the CME certificate.

TARGET AUDIENCE

- Healthcare professionals in Europe in order of availability and access: primary care physicians and surgeons involved in spine care, physiotherapist, chiropractors, osteopaths, occupational therapists, clinical psychologists, nursing practitioners, naprapath and others who are graduated as clinicians from a recognized institution (i.e. professional school or university).
- At least two years of clinical experience is recommended but all new graduates are encouraged to register.
AIMS OF THE MODULE

Assessment & Diagnosis

The aim of day 1 is to understand the limitation of physical examination and imaging as well as the cultural differences between professions when posing a diagnosis. We will also discuss the impact of comorbidity on persistent back-pain and the influence of the biopsychosocial model in understanding back-pain.

Management of Spinal Pain

The aim of day 2 of this module is to co-develop management plans for patients presenting with spinal pain +/- radiculopathy. The plans will be underpinned by research evidence and best practice, and will be tailored according to the needs and characteristics of each patient.

LEARNING OUTCOMES

Upon successful completion of this module, learners will be able to:

Assessment & Diagnosis (DAY 1)

1. Understand back and/or neck pain in a biopsychosocial perspective
2. Understand how the biopsychosocial perspective differs from other model perspectives
3. Understand how elements from the general medical history may impact on the understanding of the individual’s back and/or neck pain
4. Understand when to refer for imaging examination
5. Know red flags
6. Understand risks for long-term sick leave and disability (yellow flags)
7. Be able to make decisions on modality for imaging examination
8. Be able to put the imaging description into a clinical context
9. Be able to give a diagnosis according to the biopsychosocial perspective of LBP
10. Be able to disseminate the diagnosis in a comprehensible way to the individual
11. Be able to communicate any limitations in functioning following from the diagnosis to the individual, the employer, insurer and others – or mitigate unnecessary limitations imposed by the individual himself/herself

SESSION 1 DIAGNOSTICS AND PHYSICAL EXAMINATION

1.1 Understand the practical utility of diagnostics (Red Flags/Yellow Flags/Other Flags)
1.2 Understand cultural differences between professions may lead to different terms that probably express the same
1.3 Appreciate the impact of comorbidity on persistent back and/or neck pain in adult age
1.4 Discuss how to make a diagnosis and how this impacts on treatment recommendations according to training and practice
1.5 Understand the utility and limitations of patient history and physical examination – aims and purposes what does the clinician need to know
1.6 Conduct a physical examination i.e. orthopaedic and neurological examination
1.7 Understand how the biopsychosocial model differ from other models of understanding back pain
SESSION 2 IMAGING
2.1 Summarize clinical use of imaging
2.2 Discuss what, when, and why do we need x-ray and/or imaging
2.3 Discuss interpretation of imaging based on vignettes
2.4 Reflect on the utility and limitations of imaging examinations

SESSION 3 ROLE PLAY
3.1 Perform the following
   o Uptake of a systematic anamnesis
   o Physical examination, orthopaedic and neurological examination
   o Discuss referral for imaging
   o Understand the impact of co-morbidity for recovery
   o Make a conclusive assessment
3.2 Discuss core issues for patient history taking and physical examination

Management of Spinal Pain (Day 2)

SESSION 4 CLINICAL PATHWAYS
4.1 Identify the clinical pathway for the management of a) ‘non-specific back pain’ and b) radiculopathy in their country, and explain how these differ to other European pathways

SESSION 5 SHARED DECISION-MAKING
5.1 Evaluate participants shared decision-making skills, scoring an audio-recorded consultation with the OPTION tool

SESSION 6 STRATIFIED CARE
6.1 Explain the benefits of stratified care and identify the 3 subgroups (low, medium and high risk of poor outcome) using the STarT Back Screening Tool

SESSION 7 QUICK FIRE TASK & DISCUSSION
7.1 Design a plan of early and long-term management based on the risk of poor outcome, including self-management advice for a person with spinal pain

SESSION 8 EVALUATING THE EVIDENCE BASE FOR PATIENTS WITH AND WITHOUT RADICULOPATHY
8.1 Using the evidence base for spine interventions, identify treatment preferences for patients experiencing spinal pain with and without radiculopathy
INSTRUCTIONAL METHODS

Pre-learning & e-learning activities

Assessment & Diagnosis

- Preparatory readings: Read the articles listed in the Ressource section below
- E-learning methods: Watch the following video prior to the course: 
  https://www.youtube.com/watch?v=BOjTegn9RuY

Management of spinal Pain

- Preparatory reading: Search and identify the clinical pathway for the management of non-specific back pain and radiculopathy in the learner’s own country and compare it to other pathways eg. UK [outcome 1]
- Audio-record a consultation with a patient consulting with spine pain (with their consent) [outcome 2]
- Watch a short presentation showing how to score the shared decision-making that took place using the OPTION tool [outcome 2]
- Watch a 9-minute video https://www.keele.ac.uk/sbst/clinician/ outlining the STarT Back Screening Tool and how to score it and identify the 3 subgroups [outcome 3].
- Classroom teaching: Interactive lectures [outcomes 1, 2, 3, 6]
- Facilitated group discussions based on case examples [outcomes 4, 5 & 6]

ASSESSMENT

For the completion of the module, participants will be required to submit a reflective essay. Requirements and structure will be given at the end of the module.

COURSE EVALUATION BY THE PARTICIPANTS

In line with EACCME’s requirements for accredited activities, participants will be requested to complete a mandatory course evaluation at the end of the module in the form of a short online survey. Responding to the survey is a condition in order for participants to obtain their CME certificates
LIST OF RESOURCES

Assessment and diagnosis

MINIMUM REQUIREMENT

Management of spinal Pain

MINIMUM REQUIREMENT

SUPPLEMENTARY

- NHS England National Pathway of Care for Low Back and Radicular Pain: https://docs.wixstatic.com/ugd/dd7c8a_5adf479cb66b4e8ba547fbdc9dccc6e5.pdf
- STarT Back Screening Tool: 9-minute video: https://www.keele.ac.uk/sbst/clinician/

EXTENDED LEVEL

- STarT Back Screening Tool and how to score it and identify the 3 subgroups: For further information on the tool, see: https://www.keele.ac.uk/sbst/startbacktool/usingandscoring/ https://www.sciencedirect.com/science/article/pii/S0140673611609379
