Fundamentals of spine research methodology:
How to make your research more relevant, feasible and publishable

February 24 - 28, 2014

The Morrison
Ormond Quay
Dublin 1, Ireland

Core Faculty
Margareta Nordin Dr.
Med. Sci.
Christine Cedraschi PhD
Pierre Côté PhD
L. Rachid Salmi MD PhD

Guest Faculty
Federico Balagué MD
Marco Campello PhD
Björn Rydevik MD PhD
Marek Szpalski MD

Local Hosts
Ciaran Bolger FRCSI PhD
David O’Brien FRCSI, MBA

After 2012 and 2013, the TFR Course 2014 was the third course on spine research methodology. The 15 attendees from 8 countries were given an overview of the methodology used to conduct clinical research. Again, the format was a mix between lectures and working in small groups of 3-4 participants, which was much appreciated.

The course will be continued in 2015 - Further details will follow!

Evaluation Summary

1. Did you have sufficient previous knowledge in the field to be able to benefit from the course?

2. Do you consider that the aims of the course were fulfilled?
3. Are you satisfied with the format of the course, i.e. lectures vs practice?

4. Are you satisfied with the pedagogical competence of the teachers?

5. Are you satisfied with the enthusiasm of the teachers?

6. Did you find the readings relevant to the content of the course?

7. What do you think of the morning reviews?

8. Was the contents of the course well adapted in its length?
This is what some participants said ...

"Teachers are VERY warm-hearted and competent. You feel appreciated and respected. They put a lot of energy in really discussing with participants. Thank you so much!"

"This has been a very interesting course. I’ve found the time distribution between lectures and practice is very well balanced."

"The calibre of the faculty was excellent - huge strength to the course!"

"When I read that the Spine Society of Europe was organizing a TFR Course in Dublin in February 2014, I motivated two young co-workers to have a look at the program and to register for the course."
A selection of nice impressions ...
