Fundamentals of spine research methodology: 
How to make your research more relevant, 
feasible and publishable

March 23-27, 2015

Barceló Sants
Plaça dels Països Catalans
08014 Barcelona, Spain

CORE FACULTY
Margareta Nordin Dr. Med. Sci. *
Pierre Côté DC, PhD
L. Rachid Salmi MD PhD

GUEST FACULTY
Marco Campello PhD
Björn Rydevik MD PhD
Marek Szpalski MD
Haluk Berk MD

LOCAL HOST
Ferran Pellisé MD PhD**

*Course Director
**Clinical Course Director

After 2012, 2013 and 2014 the TFR Course 2015 was the fourth course on spine research methodology. The 20 attendees from 11 countries were given an overview of the methodology used to conduct clinical research. Again, the format was a mix between lectures and working in small groups of 4 participants, which was much appreciated.

The course will be continued in 2016 - Further details will follow!
Evaluation Summary

1. Did you have sufficient previous knowledge in the field to be able to benefit from the course?

2. Do you consider that the aims of the course were fulfilled?

3. Are you satisfied with the format of the course, i.e. lectures vs practical?

4. Are you satisfied with the pedagogic competence of the teachers?

5. Are you satisfied with the enthusiasm of the teachers?

6. Did you find the readings relevant to the content of the course?
This is what some participants said ...

"Thank you very much for all, this seminar must be continued."

"I am extremely satisfied with this course. Don't change anything to it!"

The course was so good! Now I learned how to read literature and also be familiar with this psycho-medical-social model. That makes the problems more solutionable. Probably I will start a Research Group in my country."

“Very good exercise, very interesting and brings a lot of information and matter for thinking”

"Thanks a lot! Great Course!"
A selection of nice impressions ...

Greetings from TFR Course 2015 in Barcelona
