

EDISC

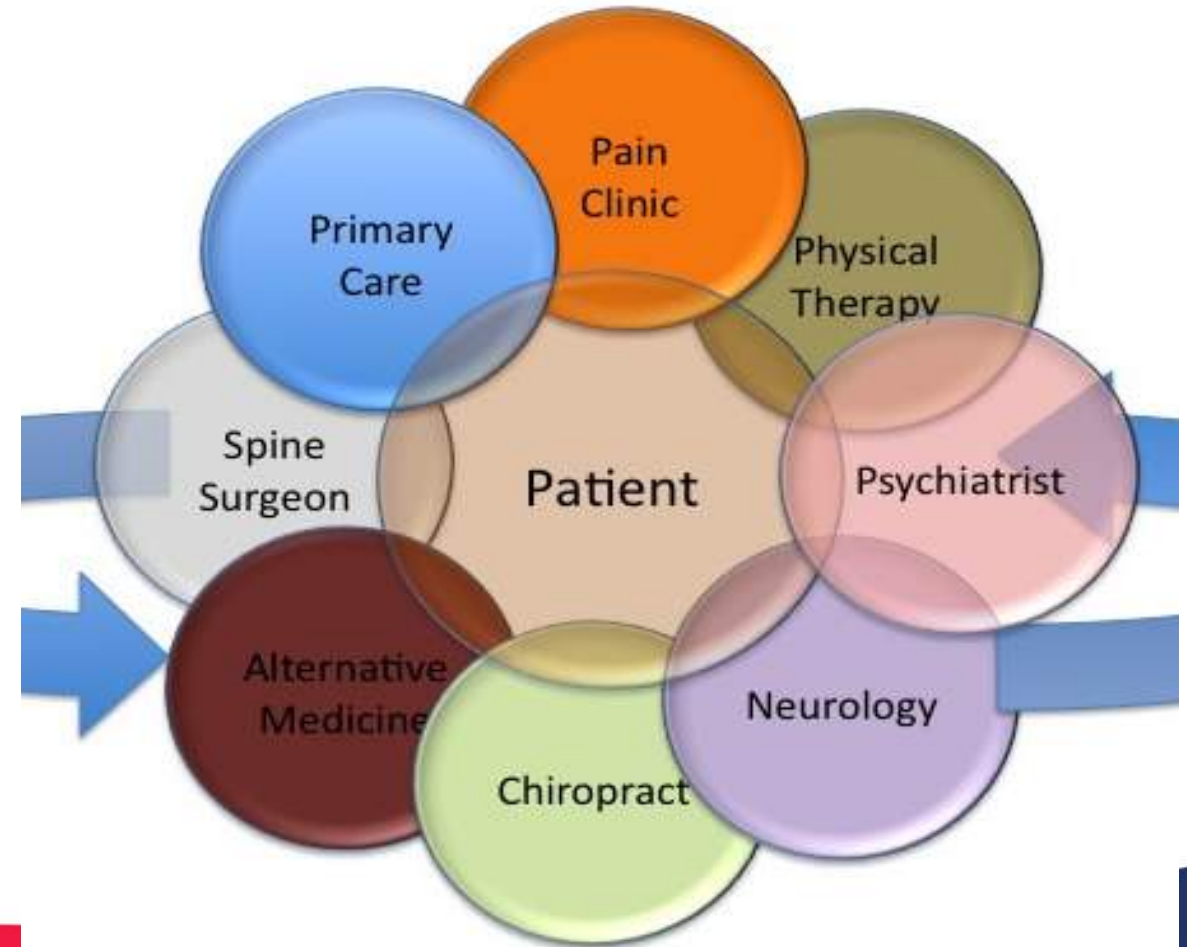

EUROSPINE Diploma Interprofessional Spine Care

Margareta Nordin and Pierre Côté
Julie-Lyn Noël and Sandy Sutter

Task Force Interprofessional Spine Care

- Conservative management of spinal disorders is rapidly evolving and moving away
 - from an “intervention-centric” approach
 - to a “patient-centred” approach
- EUROSPINE is leading the way globally in changing the nature of the management of spinal conditions with EDISC.

- Evidence-based
- Patient centered
- Integrated/Interprofessional
- Collaborative

Members of EDISC

- One meeting to finalize program in Versoix/Geneva October 28-29 2018
- Send out program for review to 40 members and external reviewers
- Received feedback from 29 reviewers
- Currently reviewing all comments and adapting changes
- Send out anonymous doodle for honorarium

What EDISC is asking from EUSSAB

- Please send participants!
- Promote EDISC Spring Meeting and at conferences (slide deck is available)
- Promote EDISC through all councils
- THANK YOU FOR ALL SUPPORT

- Harmonise the conservative management of spinal disorders throughout Europe
- We have the opportunity to bridge the gap between professions to ensure evidence-based management of spinal disorders throughout the continuum of care

- Programme has been developed by the Task Force EDISC with 18 various specialists from 10 countries
- Programme has been reviewed by 34 various spine care professionals
- Potentially, the whole programme can be **endorsed** by your respective societies

Questions for Workshop

1. Does EDISC meet the needs of your society/association?
2. Can you identify any gaps in EDISC?
3. How would your society/association benefit from collaborating with EDISC?
4. How can we help promoting EDISC within your society/association?
