**Examiner ......................................................

---

**Medication for spinal surgery/pathology**
- none
- strong opiates (WHO III)
- weak opiates (WHO II)
- NSAID, Paracetamol (WHO I)
- steroids |
| vitamin B complex |
| antibiotics |
| other ...........

**Overall outcome (examiner)**
- not applicable
- good
- poor
- excellent
- fair

**Decision**
- no further follow-up
- further follow-up
- revision foreseen
- other primary intervention foreseen

**Time**
- early, Op-day - 28 days postop
- sub-acute, 2 - 6 months
- late, > 6 months
