

- Each and every country was interested in the SSSCoE project.
- The frequency and complexity of surgery was discussed controversially.
- For some countries it seems to be easy for others it seems to be very difficult.
- It was discussed that conservative items like physiotherapy were not included, that was done by intention, because the certification process for conservative will follow.
- Payment seems to be appropriate, it was emphasised that a potential profit of the project directly goes to EUROSPINE Foundation (ESF).
- Each national member will be provided with the details of the application process and will receive a presentation to inform the national spine societies about the SSSCoE project.
- Actions: in case of interest or questions all EuSSAB representatives are asked to contact Julie-Lyn via noel@eurospine.org or Robert via conrad@eurospine.org
