EUROSPINE Diploma in Interprofessional Spine Care

EDISC COURSE 2024

Module 2: An interprofessional approach to spine care - core skills 2
Module 2: An interprofessional approach to spine care (core skills 2)

General Information

EUROSPINE, the Spine Society of Europe
c/o Pfister Treuhand AG
Bankstrasse 4, 8610 Uster-Zürich, Switzerland
W: www.eurospine.org

Chair of Education Committee
Paulo Pereira, MD PhD

Module Chair
Richard Brown, Chiropractor, UK
Jamiu Busari, General Paediatrician, NL

Chair, EDISC Committee
Pierre Côté, DC PhD

Module Faculty
Marco Campello, Physiotherapist, US
Nick Carleton-Bland, Neurosurgeon, UK
Steven Vogel, Osteopath, UK

Director of Education and Research
Julie-Lyn Noël
E: noel@eurospine.org

Education and Research Manager
Angelika Salmen
E: salmen@eurospine.org
Module 2: An interprofessional approach to spine care (core skills 2)

Quick Facts

<table>
<thead>
<tr>
<th>LIVE SESSION DATE &amp; TIME</th>
<th>19 and 20 February 2024 from 15:00 – 17:00 CET (Central European Time)</th>
</tr>
</thead>
<tbody>
<tr>
<td>VENUE</td>
<td>Virtual (live)</td>
</tr>
<tr>
<td>MAX. ATTENDEES</td>
<td>40 participants</td>
</tr>
<tr>
<td>REGISTRATION FEE</td>
<td>EUROSPINE Member: €100 Non-member: €150</td>
</tr>
<tr>
<td>CME CREDITS</td>
<td>One CME certificate is awarded for this module.</td>
</tr>
<tr>
<td></td>
<td>Accreditation by the European Board for Accreditation of Continuing Education for Health Professionals (EBAC) is pending.</td>
</tr>
<tr>
<td>LANGUAGE</td>
<td>English</td>
</tr>
<tr>
<td>DRESS CODE</td>
<td>Smart casual. You will be interacting with fellow participants on video and will be seen on camera.</td>
</tr>
<tr>
<td>E-LEARNING</td>
<td>• Preparatory readings and videos will be available and participants are encouraged to engage with the material before the live sessions.</td>
</tr>
<tr>
<td></td>
<td>• Access will be provided 4 weeks before the first live session.</td>
</tr>
<tr>
<td>MODULE COMPLETION</td>
<td>Module completion is achieved when ALL the following are met:</td>
</tr>
<tr>
<td></td>
<td>• Attendance of ≥ 90% of the live session time AND</td>
</tr>
<tr>
<td></td>
<td>• Completion of the CME evaluation and feedback surveys</td>
</tr>
<tr>
<td>TARGET AUDIENCE</td>
<td>Spine care professionals (non-surgical and surgical): primary care physicians and surgeons involved in spine care, physiotherapists, chiropractors, osteopaths, occupational therapists, clinical psychologists, nursing practitioners, naprapaths and others who are graduated as clinicians from a recognized institution (i.e. professional school or university).</td>
</tr>
<tr>
<td>IMPORTANT (!)</td>
<td>• A computer (Mac/PC) or tablet (Android/Mac) and stable internet connection are required to access the e-learning content and virtual live sessions.</td>
</tr>
<tr>
<td></td>
<td>• This module has 2 virtual live sessions and attendance is mandatory.</td>
</tr>
<tr>
<td></td>
<td>• Please log in to the Zoom session 10 minutes before live session start.</td>
</tr>
</tbody>
</table>
E-Learning Programme

Attendees are encouraged to engage with any preparatory material before a live session and actively participate in discussions and group work during live sessions.

End of Module

Aims of the Module

This module aims to:

- Familiarise learners with the concepts and practice of interprofessional collaboration in the continuum of spine care.
- Identify the promotors and barriers to interprofessional collaboration in the continuum of spine care.
- Enable learners to design and implement interprofessional collaborative models in the continuum of spine care.

Learning Outcomes

This module aims to enable learners to:

General outcomes and objectives

- Identify the key features of interprofessional collaboration;
Module 2: An interprofessional approach to spine care (core skills 2)

- describe the benefits and challenges to the development of models of interprofessional collaboration;
- Understand how interprofessional spine care benefits patients;
- Review different approaches to interprofessional collaboration;
- Analyse best practices and their implementation in inpatient and outpatient settings;
- Design the framework for an interprofessional spine care team;
- Evaluate patient outcomes within an interprofessional environment;
- Identify important factors that promote or hinder interprofessional collaboration
- Demonstrate knowledge of the roles of other health disciplines involved in in the continuum of spine care.
- Ability to collaborate with other members of the interprofessional spine care team

Outcomes and objectives for session 1: Overview
- Describe the benefits and challenges to the development of models of interprofessional collaboration;

Outcomes and objectives for session 2: Interprofessional collaboration
- Examine and discuss how interprofessional spine care benefits patients;
- Review different approaches to interprofessional collaboration;

Outcomes and objectives for session 3: Best practices
- Analyse best practices and their implementation in inpatient and outpatient settings;

Outcomes and objectives for session 4: Creating an Interprofessional Team
- Design the framework for an interprofessional spine care team;
- Evaluate patient outcomes within an interprofessional environment;
- Identify important factors that promote or hinder interprofessional collaboration

Outcomes and objectives for Pre-learning Activities:
- Identify the key features of interprofessional collaboration.

Instructional Methods

The following instructional methods will be employed in the teaching of this module:
- Pre-learning activities: Preparatory assignments
- Classroom teaching: includes the implementation of transformative learning theory, opportunity for exploring and exposing different points of view, adult learning theory
- Problem solving and critical learning activities: Assignments to work on before the face to face learning sessions
- Workshops: Dialogue groups where issues can be safely explored in a small group setting

All instructional methods should require active participation, consistent with the range of motivations for pursuing the EDISC programme. There should also be a strong emphasis on self-directed learning and pre-reading.
Educational Activities

- Pre-learning activities: Preparatory reading.
  - Learners will be asked to build foundational knowledge for the module with 4 hours of pre-module learning. This will include:
    - familiarisation with the most common models of interprofessional collaboration; reading relevant material on topic
    - understanding of the core elements of collaborative practice in healthcare; watching pre-assigned video
- Classroom teaching
  - Each of the subjects mentioned above will have a short plenary introduction as a lecture given by one of the faculty members. The introduction will provide an overview of the theme based on the literature.
- Workshops: Facilitated group discussions and practical workshop
  - Following each introduction the learners will be divided into workshop groups to discuss the translation of the theoretical learning into practice. Role-plays and examinations may be performed using case studies, videos, scans and other relevant learning material.

Assignment

For the completion of the module, participants will be required to complete the module feedback, which includes questions for self-reflection.

CME Module Evaluation

In line with EBACs requirements for accredited activities, participants will be requested to complete a mandatory evaluation at the end of the module in the form of a short online survey. Responding to the survey is a condition in order for participants to obtain their CME certificates.
