EUROSPINE Diploma in Interprofessional Spine Care

EDISC COURSE 2024

Module 4: Assessment, diagnosis and management of spinal pain
General Information

EUROSPINE, the Spine Society of Europe
c/o Pfister Treuhand AG
Bankstrasse 4, 8610 Uster-Zürich, Switzerland
W: www.eurospine.org

Chair of Education Committee
Paulo Pereira, MD PhD

Module Chair
Erik Werner, Primary Care Physician, NO (DAY 1-3)
Caroline Treanor, Physiotherapist, IE (DAY 4-6)

Chair, EDISC Committee
Pierre Côté, DC PhD

Module Faculty
Carol Cancelliere, Epidemiologist, CA
Nick Carleton-Bland, Neurosurgeon, UK
Christine Cedraschi, Psychologist, CH
Pierre Côté, Epidemiologist, CA
Alessandra Curti, Radiologist, IT
Ben Davies, Neurosurgeon, UK
Stéphane Genevay, Rheumatologist, CH
Lisa Roberts, Physiotherapist, UK
Steven Vogel, Osteopath, UK

Director of Education and Research
Julie-Lyn Noël
E: noel@eurospine.org

Education and Research Manager
Angelika Salmen
E: salmen@eurospine.org
# Quick Facts

<table>
<thead>
<tr>
<th>LIVE SESSION DATE &amp; TIME</th>
<th>15, 16, 17, 22, 23 and 24 April 2024 from 13:00 – 15:30 CEST (Central European Summer Time)</th>
</tr>
</thead>
<tbody>
<tr>
<td>VENUE</td>
<td>Virtual (live)</td>
</tr>
<tr>
<td>MAX. ATTENDEES</td>
<td>40 participants</td>
</tr>
<tr>
<td>REGISTRATION FEE</td>
<td>EUROSPINE Member: €200 Non-member: €300</td>
</tr>
<tr>
<td>CME CREDITS</td>
<td>One CME certificate is awarded for this module.</td>
</tr>
<tr>
<td></td>
<td>Accreditation by the European Board for Accreditation of Continuing Education for Health Professionals (EBAC) is pending.</td>
</tr>
<tr>
<td>LANGUAGE</td>
<td>English</td>
</tr>
<tr>
<td>DRESS CODE</td>
<td>Smart casual. You will be interacting with fellow participants on video and will be seen on camera.</td>
</tr>
<tr>
<td>E-LEARNING</td>
<td>• Preparatory readings and videos will be available and participants are encouraged to engage with the material before the live sessions.</td>
</tr>
<tr>
<td></td>
<td>• Access will be provided 4 weeks before the first live session.</td>
</tr>
<tr>
<td>MODULE COMPLETION</td>
<td>Module completion is achieved when ALL the following are met:</td>
</tr>
<tr>
<td></td>
<td>• Attendance of ≥ 90% of the live session time AND</td>
</tr>
<tr>
<td></td>
<td>• Completion of the CME evaluation and feedback surveys</td>
</tr>
<tr>
<td>TARGET AUDIENCE</td>
<td>Spine care professionals (non-surgical and surgical): primary care physicians and surgeons involved in spine care, physiotherapists, chiropractors, osteopaths, occupational therapists, clinical psychologists, nursing practitioners, naprapaths and others who are graduated as clinicians from a recognized institution (i.e. professional school or university).</td>
</tr>
<tr>
<td>IMPORTANT (!)</td>
<td>• A computer (Mac/PC) or tablet (Android/Mac) and stable internet connection are required to access the e-learning content and virtual live sessions. <strong>The course evaluation is mandatory to obtain the CME certificate.</strong></td>
</tr>
<tr>
<td></td>
<td>• This module has 6 virtual live sessions and attendance is mandatory.</td>
</tr>
<tr>
<td></td>
<td>• Please log in to the Zoom session 10 minutes before live session start</td>
</tr>
</tbody>
</table>
E-Learning Programme

Attendees are encouraged to engage with any preparatory material before live sessions and actively participate in discussions and group work during live sessions.

</tbody>
</table>
Module 4: Assessment, diagnosis and management of spinal pain

### Aims of the Module

**Assessment and Diagnosis**
The aim of sessions 1, 2 and 3 is to understand the limitation of physical examination and imaging as well as the cultural differences between professions when posing a diagnosis. We will also discuss the impact of comorbidity on persistent back-pain and the influence of the biopsychosocial model in understanding back-pain.

**Management of Spinal Pain**
The aim of sessions 4, 5 and 6 is to co-develop management plans for patients presenting with spinal pain +/- radiculopathy. The plans will be underpinned by research evidence and best practice and will be tailored according to the needs and characteristics of each patient.

### Learning Outcomes

This module aims to enable learners to:

**Assessment and Diagnosis:**
1. Understand back and/or neck pain in a biopsychosocial perspective
2. Understand how the biopsychosocial perspective differs from other model perspectives
3. Understand how elements from the general medical history may impact on the understanding of the individual’s back and/or neck pain
4. Understand when to refer for imaging examination
5. Know red flags
6. Understand risks for long-term sick leave and disability (yellow flags)
7. Be able to make decisions on modality for imaging examination
8. Be able to put the imaging description into a clinical context
9. Be able to give a diagnosis according to the biopsychosocial perspective of LBP
10. Be able to disseminate the diagnosis in a comprehensible way to the individual
11. Be able to communicate any limitations in functioning following from the diagnosis to the individual, the employer, insurer and others – or mitigate unnecessary limitations imposed by the individual himself/herself
Module 4: Assessment, diagnosis and management of spinal pain

Outcomes and objectives for session 1: Diagnostics and Physical Examination
   1.1 Understand the practical utility of diagnostics (Red Flags/Yellow Flags/Other Flags)
   1.2 Understand cultural differences between professions may lead to different terms that probably express the same
   1.3 Appreciate the impact of comorbidity on persistent back and/or neck pain in adult age
   1.4 Discuss how to make a diagnosis and how this impacts on treatment recommendations according to training and practice
   1.5 Understand the utility and limitations of patient history and physical examination – aims and purposes what does the clinician need to know
   1.6 Conduct a physical examination i.e. orthopaedic and neurological examination
   1.7 Understand how the biopsychosocial model differ from other models of understanding back pain

Outcomes and objectives for session 2: Imaging
   2.1 Summarize clinical use of imaging
   2.2 Discuss what, when and why do we need x-ray and/or imaging
   2.3 Discuss interpretation of imaging based on vignettes
   2.4 Reflect on the utility and limitations of imaging examinations

Outcomes and objectives for session 3: Role Play
   3.1 Perform the following
      o Uptake of a systematic anamnesis
      o Physical examination, orthopaedic and neurological examination
      o Discuss referral for imaging
      o Understand the impact of co-morbidity for recovery
      o Make a conclusive assessment
   3.2 Discuss core issues for patient history taking and physical examination

Management of Spinal Pain
Outcomes and objectives for session 4: Clinical Pathways
   4.1 Identify the clinical pathway for the management of a) ’non-specific back pain’ and b) radiculopathy in their country, and explain how these differ to other European pathways

Outcomes and objectives for session 5: Shared Decision-Making
   5.1 Evaluate participants shared decision-making skills, scoring an audio-recorded consultation with the OPTION tool

Outcomes and objectives for session 6: Stratified Care
   6.1 Explain the benefits of stratified care and identify the 3 subgroups (low, medium and high risk of poor outcome) using the STarT Back Screening Tool

Outcomes and objectives for session 7: Quick Fire Task & Discussion
   7.1 Design a plan of early and long-term management based on the risk of poor outcome, including self-management advice for a person with spinal pain

Outcomes and objectives for session 8: Evaluating the Evidence Base for Patients with and without Radiculopathy
Module 4: Assessment, diagnosis and management of spinal pain

8.1 Using the evidence base for spine interventions, identify treatment preferences for patients experiencing spinal pain with and without radiculopathy

**Instructional Methods**

**Pre-learning & e-learning activities**

**Assessment & Diagnosis**
- Preparatory readings: Read the articles listed in the resource section below
- E-learning methods: Watch the following video prior to the course: https://www.youtube.com/watch?v=BOjTegn9RuY

**Management of spinal Pain**
- Preparatory reading: Search and identify the clinical pathway for the management of non-specific back pain and radiculopathy in the learner’s own country and compare it to other pathways eg. UK [outcome 1]
- Audio-record a consultation with a patient consulting with spine pain (with their consent) [outcome 2]
- Watch a short presentation showing how to score the shared decision-making that took place using the OPTION tool [outcome 2]
- Watch a 9-minute video https://www.keele.ac.uk/sbst/clinician/ outlining the STarT Back Screening Tool and how to score it and identify the 3 subgroups [outcome 3].
- Classroom teaching: Interactive lectures [outcomes 1, 2, 3, 6]
- Facilitated group discussions based on case examples [outcomes 4, 5 & 6]

**Assignment**

For the completion of the module, participants will be required to complete the module feedback, which includes questions for self-reflection.

**CME Module Evaluation**

In line with EBACs requirements for accredited activities, participants will be requested to complete a mandatory evaluation at the end of the module in the form of a short online survey. Responding to the survey is a condition in order for participants to obtain their CME certificates.

**List of Resources**

**Assessment and Diagnosis**

**Mandatory Reading**
Management of Spinal Pain
